Computer Networks: Problem-solving session 2 (optional)
## Cisco Packet Tracer: Configure Initial Switch Settings

Please design a network with the following logical topology:

1. Please set the switch password "cisco" for Switch0 ("class" for Switch1) using the console cable, i.e., secure the user EXEC mode access.

2. Please set the password "cisco" for Switch0 ("class" for Switch1) to secure remote access via Telnet/SSH to the device. Please use the console cable.

3. Encrypt all passwords.

4. Please send the startup configuration file as a report.
